

An aerial photograph of a group of people walking on a paved sidewalk. The sun is low in the sky, creating long, dark, and distinct shadows for each person. The shadows are cast in various directions, some parallel to the path of movement and others at an angle. The people are dressed in casual attire like t-shirts, jeans, and backpacks. The overall scene conveys a sense of movement and community in an urban environment.

What makes for **effective** analysis?

Thinking about neighborhoods, of course...
